Would your LAW OFFICE benefit from Managed Print?

There are few industries that rely more heavily on paper documents than the legal industry.

Many law offices are unaware of the total cost of ownership (TCO) of their printing infrastructure and activities. Without controls and measures, your printing costs could be higher than necessary. Printing expenses can account for up to six percent of your total revenue.

But, Managed Print Services (MPS) offers an effective solution to control print costs in the legal industry, while improving document workflows and printing processes.

Benefits of MPS:

MAXIMUM UPTIME - Because law firms are so paper intensive, you can't afford downtime on your critical printing and imaging devices. We will work with your law firm to ensure maximum uptime and fast service response times in the unlikely event of an outage.

CONVENIENT SUPPLIES AND BILLING - We will conveniently provide you with a single source and one invoice for service, supplies, and equipment, thus freeing up your internal resources.

PRINTER FLEET OPTIMIZATION - We will also make sure your staff and associates have a reliable paper-to-digital transformation process to ensure they can always print efficiently and cost-effectively.

COST SAVINGS - With MPS, your legal firm can save up to 30 percent on printing costs, while reaping many benefits that boost productivity and efficiency.

We are committed to responding to the needs of the legal industry by helping law firms achieve:

- ✔ Paper-to-digital Workflows
- ✔ Sarbanes-Oxley Act Compliance
- ✔ Increased Efficiency
- ✔ Reduced Costs
